CST Covers Aluminum Dome 10,000 seat multi-purpose arena

The gold anodized CST Covers Aluminum Dome rises 56 feet above the arena's 40' high steel-frame exterior wall. White, vinyl-faced fiberglass insulation bonded to the interior of the 2,016 triangular aluminum roof panels keeps cooling costs low and

provides effective accoustical absorption. The dome was engineered to support a gross rigging load of 86,000 pounds, plus the added weight of a scoreboard, speaker cluster and catwalks.
