

Glass-Fused-To-Steel Feed Storage Structures

Harvestore® Testimonial

Superior Feed Quality!

Steve & Vern Schoepp have three 2080's and a 2060 at their main dairy and three 2090's at their heifer facility. They milk 130 Holsteins with robots, have a robotic calf feeding system, and run 800 acres in Dane County, WI.

“We have much less waste than with bags or bunks and the quality of the feed is superior. Harvestore® structures are faster and easier to feed from than other methods. We push a few buttons and we are set. No diesel or gas engines to maintain or pour expensive fuel through for feeding. We can put up more feed in a day with Harvestore's than with other systems; you put it in the structures and you are done.

On the coldest day of the year, we are sitting in our heated trucks watching our bunks get full. The service is the best of any supplier we work with and

with regular maintenance, we feel Harvestore's are way cheaper in the long run,” says Steve.

Installing Dealer: Badgerland Agri-Systems, Inc.
Authorized Harvestore and Slurrystore Sales and Services Since the 1950's.
