

TecTank™

API-12B Petroleum Tanks

CST

TecTank™

In 1916, CST™ took the leadership role in developing a solution for storing petroleum. The ultimate result was a bolted, chime panel tank design that API recognized in 1929. Since then, CST has manufactured over 100,000 certified tanks and remains the preferred API-12B certified tank manufacturer.

CST has invested in continuously improving upon the non-standard aspects of the API-12B design by factory-coating the panels and developing additional gasket materials. By combining the basic API-12B design with other innovative designs, CST can also provide expanded capacities and accommodate additional cover options.

- > World's first Certified API-12B Monogrammed Tank Manufacturer
- > All crude oil storage tanks are completely coated inside and out with CST's OptiBond™ coating process
- > Excellent corrosion resistance and immersion performance
- > Parts are packaged unassembled in compact kits, allowing economical shipping to any building site in the world
- > Custom designs available to meet specific needs

Need Immediate Short or Long Term Crude Oil Storage?

- ✓ 3 – 5 Week Lead Time From Order to Ship Date*
- ✓ 100 to 10,000 Barrels
- ✓ Leading API-12B Tank Manufacturer

» BOLTED LIQUID STORAGE TANKS

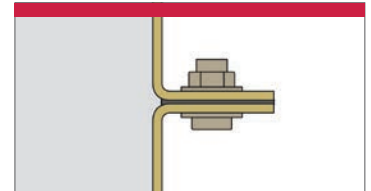

API-12B Storage Tank Features:

- Built strictly to API-12B standards and audited by API inspectors to ensure compliance
- Can be easily trucked to remote locations or disassembled, moved and reconstructed as necessary
- Requires less site preparation and is 1/3 of the space needed vs. other temporary storage needs
- EMR rate well below the industry average
- Custom designs available to meet specific needs
- Durable Trico Bond EP® epoxy coating extends tank life and limits operating maintenance costs
- Tanks are manufactured in an ISO 9001:2015 Certified facility
- Modular design makes it easy to increase capacity or make any repairs

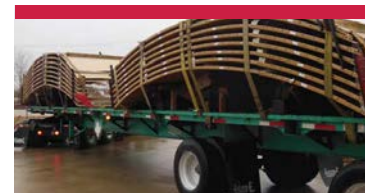

Tank Applications:

- Crude Oil
- Process Water
- Water
- Drilling Mud

57,000	2,394,000	124 ft.	26 ft.		✓	✓

» Chime panel bolted tanks feature factory formed flanges at horizontal seams for added structural strength.

» Panels are precision manufactured and pre-assembled for convenient shipping and easy construction.

CST designs larger non-monogrammed capacity tanks that are not included in the API-12B standard but use the same configuration and construction style as the monogrammed sizes.

*3 - 5 week lead time is from order to ship date and does not include construction.
